Date	September 5, 2025
Subject	Supplies Discontinuation for Legacy Non-regional YMCKT & YMCKT-KT Ribbons used on Datacard® SP, CP, FP, SD, CD & CE series Card Printers

Introduction

Entrust announces the **Supplies Discontinuation Notice** for specific Legacy non-regional YMCKT & YMCKT-KT color panel print ribbons used on out of production Datacard SP, CP, FP, SD, CD and CE series card printers.

SUMMARY

Our legacy non-regional 101mm color panel print ribbons have been available for more than a decade with YMCKT & YMCKT-KT ribbon formats nearing their maturity.

Effective today, Entrust is discontinuing the below Legacy color panel ribbons:

- 534000-002 YMCKT Color Panel Ribbons / case item 721018
- 535000-002 YMCKT Color Panel Ribbons / case item 721040
- 534000-003 YMCKT Color Panel Ribbons / case item 721019
- 535000-003 YMCKT Color Panel Ribbons / case item 721041
- 534000-006 YMCKT Color Panel Ribbon / case item 721022
- 535000-006 YMCKT Color Panel Ribbon / case item 721043

The remaining inventory of these items is available for purchase until existing supplies have been depleted. At that time, these products will no longer be available.

This communication impacts our Legacy 101mm color panel ribbons YMCKT and YMCKT-KT only. No worries - this discontinuation does not have any impact on our common use SD or CD series regional 98mm ribbons YMCKT or YMCKT-KT ribbons.

We also recognize these discontinued ribbons have been available for use in several different printer models. Entrust is here to help with alternative ribbon options to continue your card production with high quality card printing, depending on the card printer model.

The table following is designed to help guide you through ribbon options available for each of the out of production printers mentioned.

- The SD, CD and CE series card printers all have a simple alternative solution by migrating over to the 98mm regional ribbons for continued availability. The regional 98mm ribbons offer enhanced printer efficiency, lower cost per card and helps to

reduce environmental impact with less ribbon material use. Check out all the details on: <https://www.entrust.com/issuance-systems/instant/id-card-issuance/supplies/c/regional-supplies>

- The SP, CP and FP series card printers have been out of production for many years and have well surpassed the end of support phase. Unfortunately, these older printers do not have the technology for using our 98mm regional ribbons. For these printer models, we have a short-term alternative for one more year. During this time, we recommend reviewing your last-time legacy 101mm ribbon purchase needs prior to September 2026 as well as consideration for a new state-of-the-art Entrust Sigma series card printers.

See the following table for full details of Entrust item numbers and alternative ribbons.

Actions for SD, CD, CE Series Card Printers:

Panel Format	Item #	Unit Yield	Short term (1 year) Option	Longer term Low-cost Option
YMCKT	534000-002 721018	250 4,000	Use of: Universal ribbon 535000-103 YMCKT 500 yield ribbon 744064 YMCKT 8,000 yield (case of 16 rolls) Available through September 30, 2026. At that time universal ribbon will also be discontinued.	Migrate to regional YMCKT 250 534700-001-R*
