AiO

All in One

The badge that already answers your needs

The turnkey solution for your multi-application badge

You wish to set up a unique and evolving badge while reinforcing the security of your installations.

Scopus has designed for you the encoded badge that meets the standardised way to the main use cases of the badge.

AiO® is based on MIFARE® DESFire® technology, which is ISO 14443A compliant.

Secure and open, AiO® is a multi-application badge, pre-configured to meet all the uses of the badge that can be personalized with the name, first name and photo of each employee.

AiO® offers you a ready-to-use solution that is compatible with all systems using your badge in the company.

AiO® guarantees the security of your ID thanks to the use of AES cryptography, a strong authentication method.

AiO® contains several security levels. The right level security level is applied to the identifiers according to the need of each use.

Physical access control
Catering
Time and activity management
Automatic distribution

+ + +

APPLICATIONS

+ + +

Logical access control
