ADVANTAGES OF THE TCM®

MANAGEMENT EFFICIENCY

With TCM®, the badge office is open 24 hours a day 7 days a week, 365 days a year. You don't need any resources required to provide this service.

MANUFACTURING PRODUCTIVITY

The badges are manufactured on our French production site : secure industrial environment, shared resources, dedicated skills or on your own site.

SECURITY OF REQUESTS

TCM® integrates a Workflow that allows you, if you wish, to define a validation cycle for badges before launching the production. The requests automatically sent by Web services, are secure and fully automated. Our production system sends back the status of the requests, allowing you to follow the evolution of your production. You are easily and quickly notified at each step of the process.

EVOLUTIVENESS

TCM® adapts to your needs regardless of the size of your company and the badge technology you use, from simple identification badges to contactless smart badges contactless chip (RFID, NFC,...) or contact badge.

RELIABLE, SECURE AND MANAGED TECHNICAL ARCHITECTURE AND ADMINISTERED

Based on Microsoft's Azure®, TCM® is entirely hosted and administered by SCOPUS eliminating potential technical problems and guaranteeing the permanent availability of the information as well as the security access and data security.

All data are encrypted, which preserves their security and also facilitates the CNIL declarations. The entire solution complies with General Data Protection Regulation REQUIREMENTS. TCM® ensures adequate capacity without limitation of servers, support and regular back-ups.

OPTIMIZATION OF THE INVESTMENT

No system to buy (software, printer), no maintenance or installation, no dedicated personnel, training reduced to its simplest expression.

TCM® ARCHITECTURE
